These original Mechanix Wear gloves are a staple item used by professional mechanics all over the world, and with good reason--they offer superior fit and control, while allowing for excellent dexterity and protection. Their supple Clarino palm provides a firm grip, and their 2-way stretch spandex top makes them fit like a second skin. These gloves have a smooth-surface thumb and index finger point of contact, to improve your grip and handling, and their redesigned fingertip pattern reduces seams and enhances sensitivity. These are the gloves that started it all, and they continue to be a favorite because their quality speaks for itself!
