

## Socket Sets - Mixed Drive

**SENATOR**  
QUALITY TOOLING

**1/4" Drive** Ideal for assembly and servicing of small precision mechanisms associated with electrical, electronic, ignition and refrigeration work.

**3/8" Drive** Used in the automotive and aerospace

industries. The weight to strength ratio ensures the reliability and accessibility that is so important on this type of production. Sockets have a knurl feature to give a high grip which is essential for a quick tool change when your hands are greasy/oily. The 12 point bi-hexagon side drive design will give a higher torque than normal sockets, grip worn nuts and will not round off existing nuts.

Manufactured from chrome vanadium and are fully chrome plated with a mirror finish and aluminium-free. Chamfered leading edge ensures easy fastener location.

Sockets manufactured to: **ANSI B107.5M: 1987, ANSI B107.1: 1978 & BS 4006 : 1992.**

Accessories manufactured to: **ANSI B107.10M : 1982 & BS 4006 : 1992.**
