

KENNEDY
QUALITY INDUSTRIAL TOOLING**Chain Separators**

All steel construction, industry quality roller and bush chain separator. Designed for separating roller and bush chains that have end softened pins. To remove hardened pins the ends must first be removed by grinding. Simple to operate: Grip the chain in the self-closing jaws that also supports the chain to prevent twisting as the link pins are driven out. Then turn the T-handle to drive the pins out. Always ensure that the machine is switched off before disconnecting or connecting a chain.

**Roller Chain**

Pin, roller and bush assembly.

Bush Chain

Identical to roller chain, but with the omission of the roller.
