**Axes, Machetes and Hawkbill Knife** GERBER FISKARS WESTWARD

General purpose axes drive their wedged blade into wood to fell trees, remove branches, and split logs. They have a single-bit head attached at a right angle to a long handle. Axes require two hands to swing and maximize their striking force. Axes require two hands to swing and maximize their striking force. Fiskars Machete 45HE08 is for grass, soft fibrous plants, light brush, perennials, and small roots. The hook/tip is for dividing plants, clump cutting (pulling motion), and digging small roots and weeds. Serration for precision cutting of grass. 45HE11 is for large dense areas of lighter weight material. Blade tip chops grass, palms, and branches. Westward models have a steel blade with a powder-coated paint finish, resistant to rust and abrasion. Hawkbill Knife has carbon steel blade and ergonomic plastic handle.

**Brush Clearing Tools**

Brush Axe has a thick, drop-forged blade and nonstick coating. Insert-molded design prevents blade from loosening. Machete Axe body slices grass and vines while the hook is used for power chopping grass and palms. The head can be used for quick, controlled chopping. The end of the axe is used for push cutting and chiseling. Double-Edge Bush Hook is for clearing brush, weeds, tough vines, and undergrowth. Carbon steel blade has both edges sharpened. Clearing Hook allows controlled cutting for medium brush, woody stems, small branches, and hard fibrous plants. The hook/tip provides heavy-duty pulling motion for removing suckers, clearing vines. Coarse saw edge for precision cutting. Use Ditch Bank Blade for clearing undergrowth. Carbon steel blade has both edges sharpened. Clearing Hatchet works on light/medium branches. Hook is for light-duty pull cutting.

**Brush and Log Removal Tools**

**BRUSH PULLERS**

Easily clear brush with gripping teeth and strong, wide opening jaws that will not slip when engaged.

**SHRUB AND CLUMP PULLERS**

Feature triple chain system with no-slip gripping links that act as a choker to remove large shrubs, clumps of brush, and small trees.

**ROOT CUTTER**

Hardened serrated-edge blade and slide hammer cut easily through soil, removing roots without ripping up landscape. Slices roots up to 12" deep.

**SKIDDING TONGS**

Ideal for skidding and dragging operations. Opens to 25 in. 1.25 in-dia. steel tongs stay sharp for a long time. Powder-coated finish.

**MINI LOG GRAPPLE**

Easy-to-assemble grapple with 12 teeth grabs hold of logs for skidding and lifting. Powder-coated finish provides durability. 3000 lb. capacity.
