Erosion Control Blankets and Silt Fences

These soil-preserving products control erosion and sediment.

EROSION CONTROL BLANKETS AND STAPLES

Biodegradable blankets contain at least 80% aspen wood fiber. Topped with a photodegradable netting. Green color. Biodegradable anchor staples sold separately.

SILT FENCE WITH WOOD STAKES

Lightweight woven fabric lets fluids pass through while trapping soil, preventing soil loss. Fencing is pre-attached to posts for easy installation.

Gilmour NELSON Sprinklers

Whirling Sprinklers—Innovative shape control allows easy customizing of the sprinklers to the coverage area. On/Off switch allows you to adjust water flow at the sprinkler, not the faucet.

Impulse Spike Sprinkler—Shape adjustment is as simple as moving the collars to mirror the shape of the desired coverage area. On/Off switch eliminates trips from sprinkler to spigot, without getting soaked.

Oscillating Sprinklers—Plastic 425Y08 and metal 425Y09 are fully adjustable oscillating sprinklers with width and length controls. 425Y09 features On/Off control.

Traveling Sprinkler—Travels up to 200 ft. Adjustable arms and automatic shut-off. Die-cast iron body.

Tripod Telescoping Sprinkler—Far-reaching spray for large coverage areas. Metal stand and spiked feet provide durability and maximum stability.

8UNT8

9W936

Tree Watering Bags

Slow-release water bags provide an efficient means of properly watering newly planted trees or shrubs and promoting deep root growth. 8UNT8 is for use on a level surface for proper drainage. Low-profile design is for use on low-brushed bushes and trees such as pines. 9W936 can be used with chemical and nutrient additives and can be zipped together for larger applications.

Description	Color	Drain Time	Max. Tree Dia.	Item No.
6"H x 35" dia.—For Evergreens, Trees, and Shrubs	Brown	4 to 8 hr	5 in	8UNT8
30"H x 18"W at Base—For Shade Trees	Green	5 to 9 hr	4 in	9W936

Watering Cans

Cans have a long spout and handle so the container can be tipped to pour water over plants and soil in gardening applications. Feature an offset bottom to keep the cans off the ground and two handles for easy portability and pouring. Hot dipped steel containers are covered with molten zinc to protect from rust and corrosion.
