

Mouse and Rat Bait Stations and Rodenticides

Bait Stations—Stations provide a place where rodents feel secure while feeding on poisonous bait. Tamper-resistant designs keep bait out of reach of livestock, children, pets, and nontarget animals. Stations do not require the cleanup of traps and can help monitor rodent activity.

Rodenticides—Pellets are for burrow baiting, while bait packs help protect bait and fit in tight spaces. Block baits are for all-weather use and resist mold and moisture. Brodifacoum formula is for single-feed use. Bromadiolone is a single-feed bait for everyday control of recurring rodent problems. Bromethalin acts quickly and is highly palatable to rodents. Diphacinone formula is an economical bait for day-to-day control of recurring rodent problems.

| Description | Container Size L x W x H | Brand | Item No. | Pkg. Qty. |
|--|--------------------------------|----------|----------|-----------|
| Bait Stations | | | | |
| Mouse, Contains Bromethalin | | | | |
| Disposable, Includes 1-oz. Bait Block | 6 in x 2 3/8 in x 3 3/4 in | Tomcat | 16W257 | 1 |
| Refillable, Includes (16) 1-oz. Bait Blocks | 6 in x 2 3/8 in x 3 3/4 in | Tomcat | 12F883 | 1 |
| Rat, Contains Bromethalin | | | | |
| Rodent Station, Includes 15 Bait Blocks | 3 3/8 in x 6 1/4 in x 9 3/4 in | Tomcat | 45GP71 | 1 |

| Gopher Bait, Includes (40) 4-oz. Blocks | 10 lb Resealable Pail | JT Eaton | 5PTP8 | 1 * |

* Only for sale to states west of the Mississippi River and Tennessee.

Animal Traps and Repellents

Mole Traps—Trap moles at the entrances and exits of surface tunnels.

Animal Traps—Easy to bait, set, and release. Smooth inside edges do not harm animals. Effective for a wide variety of animals.

Repellex—Repellents are made from plant-based materials and have no harmful chemicals or pesticides. Not for use on food crops. Innovative emulsifying agents allow formula to absorb quickly into the soil and form a protective coating around plant roots and other underground food sources.

Transonic Mole—Nontoxic solution to most outdoor rodent problems. Stake into ground, where solar-powered unit flashes, buzzes, and vibrates, to disorient and repel moles and gophers.

Rat-Out Gel—Nontoxic gel repels rats, mice, squirrels, gophers, and other mammals. The garlic smell deters rodents before they even touch it, but if they do come into contact with the gel, its tacky quality turns them away.
