CATCHMASTER FLOWTRON®

Insect Killers and Accessories

Safe and effective units attract flies and other light-sensitive flying insect pests with multiple attractants, including ultraviolet light and pheromone-based lure.

Adhesive Board—Safe, silent traps draw pests to a strategically placed large-capacity adhesive board, where they get stuck and remain trapped. Once full, boards are easy to dispose of and replace. 24K340 GLostik Flying Insect Trap features a reflective cap with high-efficiency LED light to attract and trap insects to the disposable glue tube. Portable, reusable, battery-operated base with LED lasts up to 10,000 hr. Uses (3)AAA batteries not included. NightGuard 1ABE2 is a portable, free-standing unit. Galaxie 1ABE3–1ABE6 use a combination of ultraviolet energy and Flowtron's exclusive fly attracting pheromone. Ideally suited

for installation in front-of-store locations. Elite Stun Unit 1ABE1 special stun effect ensures out of sight capture.

Zapper Lantern Style—Once drawn to the unit, insects fly through an electrostatically charged grid where they are killed instantly. 2W546 and 3ZF09 have removable collection chambers.

PowerVac Vacuum—Once flying pests are attracted close enough to the unit, the powerful vacuum draws them in to a removable, see-through tray for easy disposal. Weatherproof, lightweight, portable unit can be used in just about any outdoor location.

Flowtron Backlight Retrofit Kit—4LV47 includes bracket with prewired socket, bulb, 2 screws, and foam pad with adhesive back.
