Cargo Nets

Round Cargo Nets can be used for securing cargo in truck beds. They can be used to accommodate packages and loads that vary in shape and size.

Rectangular Cargo Nets are available in various materials, including nylon, polyester, polypropylene, and mixed fibers. They can help to hold down cargo and other materials on trucks and trailers. Also suitable for tractors, forklifts, pallet racks, car frames, safety restraints, and off-road vehicles. Choose from hook or snap hook end types.

Note: Not for use in lifting applications.

Cargo Lifting Nets

- 4500 lb lifting capacity
- 2" webbing
- 4 sling loops

Polyester nets attach to cranes and hoists to lift and move heavy, bulky, and odd-shaped items. They have loops positioned at each corner to connect with hooks and harnesses and, when lifted together, draw the net around the cargo, securing it and providing stability during transport. Typical uses for cargo lifting nets include loading and unloading freight from ships, hoisting construction materials and equipment, and transporting loads via helicopter.
