

## Steel Closed Head Transport Drums

- UN Rating Solids: Not rated
- 2 bung holes for filling and dispensing

Durable steel drums are available with an epoxy phenolic lining that provides added resistance to solvents, chemicals, acids, and bases; or unlined with a mild rust inhibitor. Bungholes on the top can be sealed closed for secure liquid storage.

## Stainless Steel Closed Head Transport Drums

- UN Rating Solids: Not rated
- 2 bung holes for filling and dispensing
- Unlined

Corrosion-resistant stainless steel drums are ideal for use in food and sanitary applications where moisture or bacteria growth is a concern. Bungholes on the top can be sealed closed for secure liquid storage.

## Drum Bungs and Locks

**Drum bungs** are threaded plugs that fit into bungholes and create liquidtight seals to prevent dirt, dust, and contaminants from entering. Steel bungs withstand impact and long-term use. Plastic bungs are corrosion resistant and minimize the risk of damage from overtightening or repeated use.

**Drum locks** install in bungholes or clamp lids and drums together to prevent unauthorized access to contents. They have holes to add padlocks for additional security or lockout/tagout tags for identification.
