

## Palletizing Drum Trucks

### ■ Steel frames

Use to load, unload, and transport vertical drums on and off pallets and containment skids. Swivel casters and handles allow workers to easily move and transport drums with no manual lifting. 4YX02 and 29PH16 use hand pumps to lift drums; 29PH14 and 29PH15 have foot pumps for lifting.

For Drum Material	Weight Cap.	Overall WxDxH	Drum Securing Mechanism	For Maximum Drum Diameter	Body Color	Brand	Item No.
<b>30 gal, 55 gal</b>							
Metal	800 lb	50 in x 35 in x 62 in	Beak	24 in	—	Valley Craft	4YX02

Plastic, Metal	1,000 lb	45 in x 37 in x 49 in	Spring-Loaded Clamp	23 1/2 in	Red	Dayton	29PH15

## Rotating and Dispensing Drum Trucks

### ■ For 55 gal. drums

Trucks securely hold drums to lift and rotate them for controlled pouring and dispensing of contents. Wheels and handles allow easy movement and transport.

**Dayton** model lifts, tilts, and rotates drums.

**Morse** models can rotate drums 360° and allow turning drum end-over-end to mix contents. The tilt angle can be locked for dispensing, and drums can be locked in the upright position to prevent spills while transporting.

## Drum Dispensing Stackers

- For 55 gal. steel drums
- Weight capacity: 800 lbs.
- Drums can rotate 360°

Use to lift and tilt drums for dispensing or to load them on storage racks, shelves, and pallet racks. Drums are raised using a hydraulic-powered boom and wheels provide easy transport. Vestil manual stackers use a foot pump for lifting and Morse manual stackers use a hand pump for lifting. 12V DC stackers have a powered lift.

Vertical Lift	Overall WxDxH	Rotation Height	Drum Orientation	Drum Securing Mechanism	Brand	MANUAL LIFT Item No.	12V DC LIFT Item No.

**Horizontal Lift, 12V DC Powered 45EC47 (Drum sold separately.)**

**Vertical Lift, Manual Powered 8PGH8 (Drum sold separately.)**

**Stationary 20HA57**

**Mobile 33RX06**

## Drum Dumpers with Steel Chutes

- For fiber, plastic, or steel drums
- Steel housing and chute
- 115V
- 36"W
- 45° dump angle

Drums are secured to the chute then lifted and tilted to dispense contents down the chute into process equipment, hoppers, containers, and other receptacles. Handheld controls provide easy, safe operation. Mobile units have 4 casters to move to other locations as needed.
