Order-Picking Metal Shelf and Utility Carts

Carts have a flat surface near the handle that holds documents for note-taking, inventory, and similar tasks. Ideal for use in stockrooms, warehouses, and distribution centers.

Metal Shelf and Utility Carts for Instruments

Shock-absorbing casters and cushioned shelf matting absorb shock and vibration to protect instruments and delicate, vibration-sensitive equipment while moving in laboratories, testing facilities, and similar settings. Matting has a nonslip surface that prevents items from sliding on the shelves and colliding with each other. **Low-profile** carts have a top shelf that is set at a lower height for easier loading and unloading of heavy items.

* 4 swivel casters.

Vertical-Access Metal Shelf and Utility Carts

Built-in ladder allows reaching high areas in warehouses, stockrooms, and similar locations. Eliminates the need for workers to carry a separate ladder to access high areas. Ladder has a spring-loaded mechanism that prevents the cart from moving while a worker is on the ladder. This mechanism also raises the ladder and allows the cart to roll when the ladder is not in use.
