Overhead Door Openers and Control Systems
COMMERCIAL

½ HP, 115V motor for 12 cycles per hour, max. 50 cycles per day.

Hoist-Type Door Openers—Floor-level emergency chain hoist with electric interlock allows manual operation. Adjustable-friction clutch reversal system. Can be right or left mounted. Include wall-mounted, 3-button control station and standard solenoid brake. Prewired to accept sensing devices and optional radio control receiver 3ZR2 and transmitters 46K657 and 3ZR1.

Trolley-Type Door Opener—Solid double "L" rail handles heavier doors and allows quick installation. Internal auxiliary reversal system. Wired to accept optional radio control receiver 3ZR2.

COMMERCIAL ACCESSORIES

Transmitters—Feature rolling code antiburglary technology. 315 MHz. 46K657 controls up to four separate doors and includes two 5-year, 3V lithium batteries. 3ZR1 controls one door.

Note: 390 MHz frequency transmitters and receivers are available; call 1-800-GRAINGER (472-4643). On Grainger.com®, search for "garage door opener accessories."

INDUSTRIAL

½ HP, 115V continuous-duty motor for 25 cycles per hour, up to 80 to 90 cycles per day. Door closure timer can be set for 5-sec. or 1-min. increments. Hoist-type door opener 2TRN1 has an emergency chain hoist with electric interlock. 36R922 through 36R924 are manually operated chain hoists. Trolley-type door openers 2TRN3 to 2TRN6 have a low profile.

UNIVERSAL ACCESSORIES

Photo Eyes—Feature a noncontact, infrared door-reversing sensor that provides protection on doors up to 30 ft. wide. Door automatically opens when beam is broken. Include emitter, receiver, mounting brackets, and operator interface. Wall- or floor-mounted. 6XZV7 is water- and dust-tight.
