

1-800-GRAINGER (472-4643)

## Dock Bumpers

Weather- and abrasion-resistant; protect docks, dock levelers, and shelters from impact damage. Individual sections can be replaced if damaged. Installation Kits 33F680 and 33F681 are sold separately.

### LAMINATED DOCK BUMPERS

Prevent impact damage at loading dock. Constructed from same material used in heavy-duty tire cord. Weld to channel or to curb angle with one preset bolt. Mount with anchor bolts in new concrete construction or with lag bolts and shields for existing concrete. Wood dock mount requires lagging. Flush-mounted.

### D-SHAPE

Compress on contact, reducing impact force between building and vehicle. Mounting holes on the back of the bumper protect vehicle's finish. 1-piece construction reduces gaps between bumpers.

### L- AND T-SHAPE

T-Shape 2MYR8 includes a reflector.

### RECTANGULAR

Include a thick molded-in steel bar running the length of each bumper; anchor the rubber to the dock. Mounting fasteners not included.

### BUMPER STOP

Draws attention to high-traffic areas. Features a neon yellow caution stripe down its center, recessed to protect it from impact damage.

### INSTALLATION KITS

**Single Bumper**—Includes four concrete anchor bolts (¾" x 4"L) and one ¾" masonry drill bit for installing one laminated dock bumper.

**Additional Bumper**—Includes four concrete anchor bolts (¾" x 4"L). Does not include masonry drill bit.
