**Pallets**

**Aluminum Pallets**—Feature three strings across the bottom for increased strength.

**Plastic Pallets**—Provide two-way entry by pallet truck and four-way entry by fork truck. Maintenance-free and moisture-resistant, will not rot or splinter.

**Recycled Pressed Wood Pallets**—Nestable design allows stacking. Does not contain any nails or staples. Manufactured from recycled wood materials.

**Stackable**—Provide high load capacities for handling and shipping heavy products. Stackable for efficient storage.

**Nestable**—Lightweight and durable for easy handling. Nestable when empty to reduce space and freight cost.

**Rackable**—Allow products to be stored in a variety of supported or edge rack systems.

**Adaptable Pallet**

Save floor space by creating custom pallets from 12" to 8-ft. long using interlocking units. EZ Band notch on end of each unit provides a way to cross-band product to the assembled pallet at every 12". Lightweight pallets are ideal for closed loop or returnable system, in-house movement, and shipping of varying-sized items. Units allow for easy storage of supplies that need to be kept off the ground.
