## Carbon Steel Transport Drums

Lined drums feature a modified phenolic coating that resists corrosion and chemical reactivity. Unlined drums are treated with a mild rust inhibitor.

**Open-Head**—Removable covers are EPDM-gasketed with either a UN-qualified lever lock or bolt. No tools, torque, or ring gap measurements are required for lever lock ring.

**Closed-Head**—Drum lids are permanently secured and include 2" and 3/4" steel plugs and flanges with Buna gaskets.

**Salvage/Overpack**—Use open drums for transporting leaking or damaged containers. Covers are EPDM-gasketed and secured with lever lock ring closures or bolt. Yellow drums with red cover feature "Salvage Drum" logo.

## Stainless Steel Transport Drums

Stainless steel drums feature better corrosion resistance and tensile strength than carbon steel drums. Type 304, 2B finish. Open-head drums close easily with a carbon steel bolt ring closure. Closed-head drums feature a 2" x 3/4" flanged fitting with a Buna gasket.
