Folding Hand Trucks

Collapse to save space when stored or transported. Can be placed in a vehicle trunk, utility closet, or similar location between uses.

Telescoping hand trucks have a handle that retracts to save space when trucks are not in use.

Heavy-duty hand truck has a higher load capacity and is used for package delivery and other applications with heavy items.

Luggage hand trucks have deep nose plates that can support luggage or other bulky items.

Cylinder Hand Trucks

Frames are shaped to accommodate specific sizes and quantities of cylinders. Used for moving cylinders in medical, laboratory, food-processing, manufacturing, and construction applications.

Standard cylinder hand trucks have a steel frame and nose plate and come with a chain or strap to secure cylinders to the trucks.

Magnetic-hold cylinder hand truck has strong magnets that hold gas cylinders securely in place. Allows cylinders to be quickly loaded and unloaded.

Ergonomic tilt-back cylinder hand trucks can rest on all four wheels when they are tilted back.
