## Drum Hand Trucks

A curved frame cradles a drum as it's being moved with the trucks. These hand trucks have prongs that slide under the drum to support it when it is leaned back, and they allow heavy drums to be moved without having to lift them. They also come with a strap or chime hook for securing the drum to the trucks. All feature a prong nose plate and a dual handle design.

**Ergonomic tilt-back trucks** have two swivel casters mounted on a rear frame extension. The casters support the trucks when they are tilted back, which reduces the physical effort it takes to keep the trucks upright when moving heavy drums.

**Dispensing trucks** can be laid down horizontally to allow the contents of a drum to be dispensed while the drum is secured to the trucks. The frame extension also supports the drum and keeps it elevated off the ground during dispensing.

**Aluminum-frame drum hand trucks** are lighter than steel-frame drum hand trucks and resist rusting when exposed to water.

For Container Capacity	For Container Material	Load Capacity	Overall HxWxD	Wheel Type/Material	Item No.
<b>Steel-Frame Drum Hand Trucks</b>					
30 gal, 55 gal	Plastic, Steel	1,000 lb	56 1/2 in x 23 1/2 in x 14 1/2 in	Solid Polyolefin	34D664

## Drum Cradles

**55-GAL.**

Cross-braced, channeled steel cradle frame with nonsparking oil- and chemical-resistant wheels.

**1GC91**—Four 3" rigid polyolefin wheels are mounted inside the frame.

**3BA26**—Two 3" rigid polyolefin wheels and two 3" polyolefin swivel casters.

**30- AND 55-GAL.**

Four 4" rigid polyolefin rollers allow drum to be rotated for positioning; resist reaction with fats, oil, and chemicals. Partially assembled. Top section has welded steel construction that bolts to the uprights. Retractable hardwood handles.

Cap. (lb.)	Dispensing Height (in.)	Level Height (in.)	L (in.)	W (in.)	Item No.

## Drum Dispensing & Transport Dollies

Specialized dollies can be used for moving drum-dispensing systems, which consist of a 55-gallon drum, hose, and pumping equipment. The dollies have a deck for the drum, pump mounts for the drum pump system, and rubber casters.

Load Capacity	For Max. Container Diameter	Deck Shape	Caster/Wheel Configuration	Brand	Item No.
