## Welding Cylinder Hand Trucks

Used to transport oxygen and acetylene gas cylinders used in welding applications.

**Firewall welding cylinder hand trucks** have a steel firewall that forms a barrier between cylinders on the trucks and helps prevent fires or explosions. It also protects cylinders from damage during transfer and storage. May be used to store cylinders for long periods of time (more than 24 hours).

**Ergonomic tilt-back welding cylinder hand truck and welding cylinder hand trucks** may be used for storing cylinders for short periods of time (less than 24 hours).

## Spark- and Corrosion-Resistant Cylinder Hand Trucks

Plastic trucks will not create sparks that might ignite volatile gases such as welding gases. Will not rust when used in wet or damp environments.

## Load-Control Cylinder Hand Truck with Brake

Hand brake slows or stops the truck when moving up or down inclines or ramps, to help operators maintain control when traveling on inclines or exiting vehicles or buildings. Aluminum truck resists rusting when used in damp or wet environments. Includes stair climbers.
