

Find more information on Hand Trucks on page 1137.

Pail and Drum Hand Trucks

Designed for moving large, heavy containers such as pails or drums.

Powered hand trucks have a battery-powered motor that reduces effort when moving loaded trucks.

Knock-down hand trucks are sold unassembled and cost less to ship.

Ergonomic tilt-back hand trucks have two small wheels mounted on a frame extension behind the two primary wheels. The rear wheels support the

trucks when tilted back, reducing the physical effort required when moving heavy drums.

Dispensing hand trucks can be laid down horizontally to allow the contents of a drum to be dispensed while the drum is secured to the trucks.
