Furniture Hand Trucks

Stacking-chair hand trucks cradle columns of stackable chairs.

Folding-chair hand truck has hanger posts that hold multiple folding chairs.

File-cabinet hand truck has a nose plate that slides under the edge of a file cabinet, and an adjustable arm that grasps the top front edge of the cabinet.

Desk and table hand trucks have a nose plate that engages the legs of a table, and a lift fork that engages the bottom of the tabletop.

Machinery and Equipment Movers

Movers have forks or noseplates that slide under heavy equipment such as furniture, crates, and machinery. Lifting mechanism reduces physical effort when raising equipment off the floor. Each mover requires one operator. 13V407, 13V408, 13V411, and 13V412 include load-securing straps.

Mechanical-lift movers have mechanical lift mechanism with hand pump lift control.

Hydraulic-lift movers require less physical effort to operate than mechanical-lift movers. Note: Sold in pairs and must be used in pairs.

Load Capacity	Overall LxWxH	Maximum Lifting Height	Caster Wheel Type	Caster Wheel/Tread Material	Handle Type	Item No.
Mechanical-Lift Movers with Middle Nose Plate
