Wire Security Carts

Wire security carts are rolling wire cages with doors that lock for secure storage. They are lighter and allow users to see items on the carts more easily than welded mesh security carts. The wire mesh walls and doors let air circulate through the carts and allow dirt and dust to fall through them, which helps keep them clean.

Dual-Latch Welded Mesh Security Carts

The two latches on these carts can be locked with a padlock or other locking device to secure the carts' contents. The carts' doors and/or walls are made from welded steel mesh and have small openings that let air circulate through them and keep the carts' contents visible. The carts' fixed shelves are welded in place and cannot be moved. All carts have two swivel and two rigid casters.

Welded Mesh Security Carts

The welded steel mesh doors and/or walls on these carts have small openings that let air circulate through them and keep items on the carts visible. The carts' doors have a latch or hasp that can be locked with a padlock or other locking device to secure the carts' contents. All carts have two swivel and two rigid casters. **Louvered panels** hold compatible bins for organizing and storing small parts.

Single-Side-Access Mesh-Wall Metal Stock Trucks

Mesh walls enclose three sides of the shelves on these stock trucks to keep items from falling off the shelves. The shelves can be loaded on the one side that does not have a wall. Mesh walls can retain large and small items. They allow air to circulate through the stock truck and let users see items on the shelves.
