* 4 swivel, 2 rigid casters.

General Purpose Steel-Deck Platform Trucks

Platform trucks with a steel deck provide good strength for transporting a wide variety of materials. They are commonly used for moving raw materials, packages, tools, and equipment in warehouses, factories, loading docks, stock rooms, and mail rooms. All have two swivel and two rigid casters, except as noted.

16D330

13X486

Narrow Steel-Deck Platform Trucks

These platform trucks have a long, narrow steel deck with tall handles at the ends. Also called U-boat platform trucks, they are used for moving tall stacks of packaged goods and other boxed items. The trucks can pivot 360° when maneuvering in tight spaces such as aisles in warehouses, supermarkets, retail stores, and stock rooms. All have four swivel and two rigid casters, except as noted.

* 4 swivel casters.

High-Capacity Steel-Deck Platform Trucks

High-capacity steel-deck platform trucks have two large-diameter, rigid, axle-mounted wheels that let the trucks bear heavy loads and start rolling more easily when loaded than other steel-deck platform trucks. They also have two swivel casters that allow them to maneuver around curves and obstacles. Suitable for moving molds, dies, metal sheets and coils, and other heavy equipment in industrial locations such as manufacturing plants, warehouses, and construction sites.
