

Aluminum-Deck Platform Trucks

Aluminum-deck platform trucks resist corrosion and are lighter than platform trucks with stainless-steel or steel decks. **Compact folding handles** collapse to save space when storing the trucks. **Extendable decks** can be pulled out to allow the trucks to carry large items. **Narrow decks** can maneuver in aisles and other tight spaces. **Tall handles** prevent tall stacks of packaged goods and other boxed items from falling off the trucks as they're moving.

* (4) swivel, (2) rigid casters.

High-Strength Stainless-Steel-Deck Platform Trucks

Platform trucks with a stainless-steel deck are stronger and more corrosion-resistant than aluminum-deck platform trucks, and they have a polished finish that eases cleanup. Suitable for labs, medical facilities, food- and beverage-manufacturing plants, and other areas where the trucks will be cleaned and washed down often. All have two swivel and two rigid casters.

General Purpose Wooden-Deck Platform Trucks

Wooden-deck platform trucks make less noise and are less likely to damage delicate materials and finishes on products carried on the trucks than metal-deck platform trucks. **General purpose** trucks are suitable for a wide range of applications. They have two swivel and two rigid casters unless noted otherwise. **Narrow tail-handle** trucks are used for moving tall stacks of packaged goods and other boxed items. They have a combination of two rigid casters and four swivel casters and can pivot 360° when maneuvering in warehouse aisles and other tight spaces.

Load-Securing Wooden-Deck Platform Trucks

Load-securing wooden-deck platform trucks have side panels that install onto three or four sides of the trucks' deck to keep items from falling off while the trucks are moving. The panels can be removed to facilitate loading and unloading. All of these trucks have two swivel casters and two rigid casters.
