

Steel-Deck Wagon Trucks

Wagon trucks are typically pulled instead of pushed, and they have a front-mounted handle that lets users guide heavy loads and maneuver them around corners. **Lipped** deck has a lipped edge that stops items from sliding off it. **Flush** deck lets heavy items slide onto or off of the deck to reduce effort during loading and unloading. **Flow-through** deck has openings that let debris and liquid fall through it to keep the trucks clean when used in dirty or wet areas. **Towable** trucks have a T-bar handle with a ring and can be manually pushed or connected to towing equipment for occasional low-speed towing applications. All of these trucks are constructed of 12-ga. steel and all ship assembled, except 26Y475.

Wagon Trucks with Flow-Through High-Volume Side-Panel Metal Deck

- Overall height, with sides: 21 1/2 in (12X312); 26 in (12X313); 24 in (12X315)

The perforated metal deck on these wagon trucks has openings that let debris and liquid fall through it, which helps keep the wagons clean when used in dirty or wet areas. The wagons' side walls stop loads from falling off and can be folded down or removed to reduce straining and lifting when loading or unloading heavy items. Trucks ship unassembled.

Load Capacity	Deck Length	Deck Width	Deck Height	Overall Width	Overall Height	Frame Gauge	Wheel Dia.	Wheel Type	Item No.
400 lb	34 in	18 in	13 1/2 in	20 in	18 ga	10 in	Pneumatic	12X312

Bins sold separately, available on Grainger.com

Wire-Spool Dispensing Cart

This cart has spindles that hold spools of wire and allow quick access for replacing spools. Wire guides under the cart's work surface hold wire ends for dispensing and cutting. The cart has lowered panels for attaching bins, shelves, and other optional accessories that hold items that are not stored on spools. Shipped assembled. 1200-lb. load capacity. Comes with two swivel and two rigid casters.

Overall Length	Overall Width	Overall Height	Item No.
32 1/2 in	18 1/8 in	46 1/8 in	5LVF8

Two-Wheel Wire-Dispensing Carts

These carts have two semipneumatic wheels and can be tilted and rolled like a hand truck. They have multiple spindles that hold wire and other materials stored on reels or spools. The spindles can be removed when replacing spools and reels. Wire guides keep the ends of wires accessible and organized for dispensing.
