

High-Lift Pallet Jacks

• Steel frame

Manual jacks have a foot pedal or handle that operators pump to activate the hydraulic pump and lift the forks.

Powered-lift/manual-push jacks can lift loads faster with less physical effort. An electric motor activates a hydraulic pump to lift and lower the forks and keep them positioned at any height within their travel range. Motor is powered by a rechargeable battery and controlled with a push button. Jacks must be pushed or pulled by hand.

Load Capacity	Width Across Forks	Width Between Forks	Handle Type	Fork Style	Item No.
Manual High-Lift Pallet Jacks					
Hand Pump Lift Control					
2,200 lb	21 1/2 in	9 in	Tiller	Narrow	2PLH9
	27 in	14 1/2 in	Tiller	Standard	2PLH7
3,000 lb	20 1/2 in	8 in	Tiller	Narrow	11K277
	27 in	14 1/2 in	Tiller	Standard	11K278
Foot Pump Lift Control

Container Tilters

Raise and tilt bulk bins, totes, gaylords, crates, and containers on skids or pallets to allow operators to easily access the contents. Forks have a 90-degree range of motion and can position loads at any angle within that range.

Manual tilter requires operators to pump the handle to activate the hydraulic pump and lift and tilt the forks.

Powered-lift/manual-push tilters can raise and tilt loads faster with less physical effort. Motor is powered by a rechargeable battery and controlled with a push button. Tilters must be pushed or pulled by hand.

Load Capacity	Width Across Forks	Width Between Forks	Handle Type	Fork Style	Brand	Item No.
Manual Container Tilters						
Hand Pump Lift Control						
2,200 lb	22 in	9 1/2 in	Tiller	Standard	Dayton	33W285
Powered-Lift/Manual-Push Container Tilters						
Push Button Lift Control						
2,000 lb	24 1/2 in	11 1/2 in	Raised	Standard	Southworth	6WU48
4,000 lb	26 1/2 in	14 in	Raised	Standard	Southworth	6WU49

Stationary Pallet Level Loaders

Turntable top allows easy rotation of load.

SOUTHWORTH

Built-in fork pockets make relocating pallets easy. Low-friction, bearing-supported turntable top is easily rotated, with a center pivot and cross bar.

Compression Spring—No need for manual adjustments or tools.

Pneumatic—Pressure-adjustable air bag automatically positions load with 75 psi of shop air. 38TA15 includes vinyl bellows. 4FE90 is powered with a foot valve.

Hydraulic—Work on standard 115V power. 444F36 is a roll-on unit for use with hand pallet trucks.
