

Find additional Storage Rack Decking information on page 1183.

5-Shelf Closed

5-Shelf Open

Corrosion-Resistant Open Metal Shelving

- 72"H units with 4 shelves
- 18-ga. posts and shelves

Units resist rusting when used in kitchens, laboratories, and other environments where they will get damp or wet. Include posts and shelves and are not enclosed with back or side panels, so items stored on the shelves can be viewed from all sides. Freestanding units provide space for organizing and staging tools, supplies, and inventory. Efficiently utilize vertical space in work areas and storage areas without having to mount shelving to a wall.

Overall Width	Overall Depth	Load Capacity per Shelf *	Item No.
36 in	18 in	600 lb	1XEC2
	24 in	600 lb	1XEC4
48 in	18 in	600 lb	1XEC3
	24 in	600 lb	1XEC5

* Based on evenly distributed loads.

1XEC2

Each shelf has an additional channel-formed stiffener welded to the underside of the shelf to prevent flexing under heavy loads.

EQUIPTO

Heavy-Duty V-Stud Metal Shelving

- 84" overall height
- 14-ga. posts and 18-ga. shelves

V-stud shelf reinforcements offer more protection against shelf deflection (or sagging) than standard shelf clips when heavy items are placed on the shelves. Include braces that bolt to the posts to stabilize them and help prevent swaying. V-stud shelf reinforcements anchor and support the shelves on their posts, and the studs can be moved to adjust the height of the shelves on the posts.

Extra Heavy-Duty Bolted Metal Shelving

- Shelves adjust in 1" increments
- 14-ga. steel shelves, gray powder-coated finish
- 5 shelf levels

Standalone units bolt together and provide more strength and rigidity than open metal shelving units with lower duty levels. Able to hold dies, fixtures, jigs, and other very heavy equipment. Sturdy posts provide a frame for the shelves which bolt onto the posts.
