

## Choosing the Right Strength Storage Cabinet

### DUTY RATINGS

#### Light-Duty

- 22-24 ga.
- Suitable for holding and storing lightweight supplies and equipment in offices or areas where the units are unlikely to be subjected to impact or abuse

#### Medium-Duty

- 20-24 ga.
- Suitable for storing tools, equipment, and supplies in commercial or industrial settings not generally exposed to rough use

#### Heavy-Duty

- 16-18 ga.
- For use in industrial facilities for storing heavy tools, equipment, and supplies

### Extra-Heavy Duty

- 12-14 ga.
  - Bolt together to provide more strength and rigidity
  - For use in industrial facilities to hold dies, fixtures, jigs, and other very heavy equipment
- Super-Duty**
- 12 ga.
  - Provide the most strength and rigidity
  - For use in industrial facilities to hold heavy tools, fixtures, jigs, and other very heavy equipment

### COMMERCIAL CABINETS

Metal cabinets are suitable for offices, apartment buildings, schools, and other areas where they are not likely to be exposed to impacts or other hazards. Typically have light- to medium-duty ratings.

### INDUSTRIAL CABINETS

Metal cabinets are fully welded and suitable for warehouses, machine shops, plants, and other areas where they may be exposed to impacts, hazards, or rough conditions. Typically have heavy- to super-duty ratings.

### BASE TYPES

**Frame Base** - Cabinet sits directly on floor or flat surface.

**Legs** - Raise cabinet above floor level, allowing access beneath the cabinet.

**Leveling Base** - Integrated levelers compensate for uneven floors to help keep cabinet stable.

**tennsco**  
Storage Made Easy

**Sandusky**

**Hallowell**

## Commercial Stationary Shelf Cabinets

- Assembled
- Adjustable shelves

Metal cabinets have multiple shelves to provide storage and keep supplies and equipment organized. Suitable for offices, apartment buildings, schools, and other commercial areas.

Cabinets with leveling base have integrated levelers that compensate for uneven floors.

**Solid doors** provide security and conceal contents.

**Ventilated doors** allow air to circulate and prevent buildup of moisture and fumes. Hallowell cabinets have metal-mesh door panes. Tennsco cabinet has diamond-shaped perforations in the door panels.

**Clearview doors** have see-through panes that allow visibility to contents.
