Wire Grid Panels, Racks & Accessories

■ Hooks and shelves sold separately for customization

Mobile wire grid tool-storage rack consists of a wire grid panel on a mobile base. The racks can roll when they need to be brought to different areas in a facility or moved for cleaning or repositioning. These racks are used in garages, tool cribs, nurseries, and garden centers for storing tools with long handles, such as shovels. Includes 10 movable hooks.

Wire grid panels mount to a wall for efficient use of vertical space in kitchens, laboratories, supply closets, janitor's closets, and storage rooms while keeping floor spaces clear. Multiple panels can be mounted next to each other to expand the storage area. Mounting brackets, hooks and shelves sold separately.
