**Wall-Mount Wire Shelving Kits**

- Shelves adjust in 1" increments
- Meet NSF standards

Keep floor areas clear and allow air to circulate to provide ventilation. Openings allow dirt and debris to fall through the shelving to help keep it clean. Suitable for use in dry environments such as garages, stock rooms, and retail stores.

**Metal Wall-Mount Shelving**

Solid surface will not let small items, dust, or debris fall through.

**Steel** provides good strength. **Stainless steel** resists rust and corrosion when used in damp or humid areas such as kitchens or freezers. Shelves are recommended for dry storage. **Aluminum** is lighter than steel or stainless steel shelving and resists rust and corrosion when used in damp or wet areas such as kitchens.

**Overhead Rack**

Wire decking allows items stored on the racks to be viewed when standing under the racks and allows air to circulate through the racks for ventilation. Overhead racks mount to ceilings or overhead supports to create out-of-the-way storage for large or bulky items.
