

## Collision Sentry Warning Device

Infrared motion detectors alert forklift drivers and pedestrians to movement in dangerous blind corner intersections. Highly visible LEDs flash and an audible alarm is issued when a collision is imminent. Volume is adjustable. Portable and compact device snaps onto racking for immediate deployment. Runs on D batteries (included) and features a low-battery indicator.

## Rack Sentry Pallet Rack Protectors

Attach protectors to rack uprights to create a highly visible protective layer that withstands abuse from forklift collisions. Flexible EVA construction absorbs impact and then quickly returns to shape. Install directly onto uprights eliminating the need for drilling into and putting additional stress on the floor.

## Pallet Rack Guards and Mounting Clips

Constructed of powder-coated steel. Guards install onto pallet rack uprights to stop items from falling off the back of the racks. Also known as aisle shields, rack guards do not need to be tensioned like netting. They are made of wire mesh, so users can see through them to view the racks' contents, air can circulate through them for ventilation, and water can pass through them if sprinkler systems are activated.

## Shelving and Pallet Rack Identification

**Magnetic Label Rolls, Write-On/Wipe-Off**—Custom labels that can be easily erased and reused. Clear vinyl topcoat can be used with any standard wet- or dry-erase marker.

**Magnetic C-Channel Cardholders**—Allow for quick changes in ID cards. Easily repositioned.

**Slip 'N Stik Label Holder Kit**—Print signs using the high-visibility yellow laser/inkjet paper provided. Snap into pallet rack assembly holes and snap out to relocate. Holds any sign up to 1/8" thick. Kit includes 10 holders and twelve 11" x 8 1/2" sheets of laser/inkjet paper.

**Superscan Label Holders**—Special matte finish for accurate bar code scanning. Laser/inkjet-ready inserts are easy to print, insert, and remove.
