

For Locker General Information, see page 1250.

**Industrial Lockers**

- Durable steel construction
- Gray finish
- Include padlock hasps
- Assembled

Heavy-duty lockers are for personal storage in factories, machine shops, garages, and other areas where they may be exposed to impacts or other hazards.

**55MW82**  
(Contents not included.)

**Expanded Metal**

**Wire Mesh**  
(4) shelves, (2) units wide

**Security Cages**

- Powder-coated finish
- Assembled

Keep large or bulky items and equipment secure in warehouses, factories, and industrial settings. Metal mesh walls and doors allow air to circulate throughout the cage, preventing buildup of moisture or fumes.

Contents are clearly visible from all sides.

**Expanded metal cages** have smaller mesh openings and provide more rigidity than wire mesh. Padlock hasp included.

**Wire mesh cages** have larger mesh openings to provide more airflow and visibility than expanded mesh, and include a key lock.

**Single-Tier Starter Expanded Metal**

**Single-Tier Starter Wire Mesh**

**Bulk Storage Lockers**

- Steel frame construction
- Include padlock hasp
- 90"H

Use for secure storage of large or bulky items in condos, apartments, offices, and other facilities. Metal mesh panels and doors allow air to circulate throughout the locker, preventing buildup of moisture or fumes. Contents are clearly visible from all sides.

**Starter** units consist of 2 side panels and one door panel with 1 or 2 doors.

**Add-on** units consist of one side panel and one door panel and are attached to existing units.

Search for "Locker Accessories" on Grainger.com to find top panels, back panels, and shelves to customize your enclosure.

**Expanded metal** lockers have smaller mesh openings for a more rigid enclosure.

**Wire mesh** lockers are made with galvanized welded wire and have larger mesh openings to provide better airflow and visibility.
