Metal Wall-Mount Cabinets

- Keyed lock except as noted

Can be installed above workstations, desks, sinks, and other areas to keep tools and supplies organized and close to where they are used, while keeping floor space clear.

Clearview cabinets have see-through door panes allowing visibility to contents.

Stackable cabinets have holes on the top and bottom for fastening cabinets together, allowing multiple cabinets to be securely stacked when placed on a benchtop or similar surface. Individual cabinets can also be wall mounted.

Corrosion-resistant cabinets are stainless steel and resist rusting in areas exposed to moisture or high humidity.
