WireCrafters
Wire Partition Components

Individual components are assembled with bolts and nuts to create custom secure, enclosed areas for work or storage. Can also be used to modify existing units.
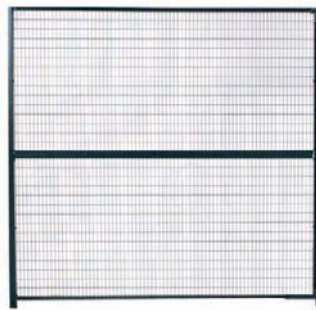

Welded-wire panels and doors have a 2" x 2" square mesh opening and a powder-coated finish.

Woven-wire panels and doors have 2" x 1" rectangular mesh opening and an enamel finish.
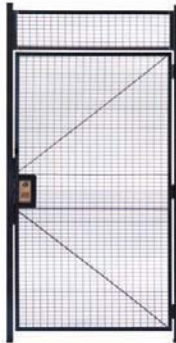

Hinged and sliding doors include 2 posts and mounting hardware.

Line posts are required on both sides of each panel for long, straight runs.

FOLDING GUARD

Wire Partition Components

Combine individual components to create custom wire partitions, tool cribs, and security cages or to modify existing units. Provide secure, enclosed areas and restrict access to valuable tools, products, and equipment in stockrooms, warehouses, and other industrial facilities. Wire mesh panels allow light and air to pass through and give clear visibility to the contents of the cages.

Adjustable gap panel offers width adjustment from 2½" to 13" and can be used to fill small gaps between panels.

Hinged and sliding doors are lockable and include mounting hardware.

HUSKY RACK & WIRE™

Quick-Assemble Wire Partition Components

- Woven wire

Components swiftly assemble with clips and pound-in rivets to create secure, enclosed areas for work or storage. Clips and rivets are not accessible from outside the cage, to increase security and prevent tampering. Panels are made of 10-ga. steel wire that is crimped and woven into a diamond-shaped mesh with a 1½" x 1½" mesh opening. All doors include mounting hardware.
