

OMNITABLE

BLACK & DECKER

DEWALT

STEELMAN

Portable Workbenches

Portable workbenches have collapsible table tops with flat surfaces that provide space to perform tasks. They are compact, easily carried, and set up quickly to aid in various functions around workshops and job sites like cutting, painting, and drying. They also have room to keep tools, equipment, and materials nearby for use.

Black & Decker—Feature steel work surface and spring lever height adjustment. Include built-in ruler and 4 swivel pegs with rubber feet.

DeWalt—Feature steel work surface and table legs with both spring pin/snap button locks. Include bolts and nylon nuts of varying sizes, 2 cord minder brackets, 2 cord snaps, 4 locking pins, grounding stud, handle, and tool holder.

OmniTable—Feature plastic work surface and include an accessory tray, built-in protractor, and 110V power strip. No. 800X20 has pull-pin height adjustment, and features a cutting groove, reversible top panel, and steel hammer plate. No. 800X21 has folding latch height adjustment and includes 2 USB outlets.

Steelman—Feature a 90° tiltable steel platform, wide jaw design, toggle clamp compatibility, and independent table adjustment. Include rotary clamp, built-in protractor, built-in ruler, and clamp.

Shop Desks

The tops of desks and cabinets serve as a flat writing surface for filling out papers, working on projects, and other work tasks.

Open-Base Shop Desks have an open base that provides shelf storage for large items.

Mobile shop desks have casters and can roll when they need to be repositioned or moved for cleaning.

Hutch Shop Desks have a hutch mounted on top of the desk. Doors conceal and protect the contents of the hutch.

Pedestal/panel desks have a pedestal with multiple drawers on one side and a panel on the other.

Closed-cabinet desks have a cabinet that provides storage for large items.

Open-cabinet desks each have a cabinet that provides storage for large items. The cabinet does not have doors, so items inside the cabinet can be seen and accessed freely.

Open-shelf shop desks have lower shelves that provide flat storage for large items. Items on the shelves can be seen and accessed freely.

Ventilated-cabinet shop desks each have a cabinet that provides shelf storage for large items. The walls and door on the cabinet are made from expanded mesh, which allows air to flow through the cabinet for ventilation. Users can see through the mesh to view the cabinet's contents without opening the door.

Bench-Mount Hutch Shop Desks sit on a bench or table. Doors conceal and protect the contents of the hutch.
