Sectional Stacking Bin Units

Heavy-gauge welded steel units have rows of bin compartments stacked vertically. Commonly used to store and organize parts and hardware in industrial facilities. Units have high weight capacities for heavy parts, tools, and equipment.

Standard Base—Freestanding units have a closed base to prevent dust or dirt from accumulating underneath.

Pallet Base—Units have fork pockets that allow them to be lifted with a forklift or pallet jack and moved without emptying the bins.

Caster Base—Units are mounted on 4 casters and can roll to any location needed. Ideal when parts are used in multiple areas of a facility.
