

## Flat Filing Systems

### FLAT FILE CABINETS

Organize and protect stored documents such as blueprints and drawings with these heavy-duty welded steel files. Hinged paper weights in drawer fronts and hoods at the rear keep papers from curling. Drawers open smoothly and quietly, while sturdy drawer rails help ensure smooth alignment. Drawer stops help prevent accidental drawer pull-out. Each drawer includes 2 pull handles and chrome label holder. Include field-installed lock kit with 2 keys. Durable powder-coated finish.

### BASES

Durable powder-coated finish. Shipped unassembled.

**Closed**—Raise flat files 4" off the floor to ease access. Support up to 5 stacked file units.

**Open**—Raise a single file unit 20" off the floor. The lower shelf helps provide extra storage space.
