Plastic Outdoor Storage Sheds

■ All units are lockable; 32XT06 includes a lock

Protect tools and equipment from sun exposure and weather. Keep stored items organized and close to where they're used to free up indoor storage areas. Plastic construction will not rust or dent. All sheds have hinged double doors.

Gable Roof shed comes to a peak allowing snow and rain to run off. Provides extra storage capacity and headroom for storing large items such as ladders and lawnmowers.

Cabinet-Style units feature a flat roof and have a compact footprint. Vertical shed is suitable for storing tall items like rakes or brooms, and horizontal sheds are suitable for storing shorter items like pool equipment or garbage bins.

Steel Sheds

Strong, waterproof corrugated steel sheds are heavier and more durable than plastic sheds. Include hinged doors with locking latches. D7717, D7718, and D7721 have single doors; D7719, D7722 and D7723 have 2 doors.

Single-slope roof sheds have a compact footprint and allow rain and snow to run off.

Gable roof sheds provide extra storage capacity and headroom for large items like ladders and lawnmowers.

Forkliftable with flat roof sheds can be moved with a forklift after they are assembled, making them ideal for facilities with frequently changing storage needs. Use for large equipment in outdoor areas such as construction sites, military facilities, and maintenance operations. Include single swing-out door, built-in rain gutters, and a wooden floor to keep the shed's contents clean and dry.
