Welding Mobile Shop Stools

■ 14"-dia. seat

Welding shop stools are made from materials that resist burning or deforming when exposed to spatter and heat during welding processes. Swivel stools let users turn while seated.

Low-Profile Mechanics' Mobile Shop Stools

Mechanics shop stools are less tall than other types of shop stools, and they allow workers to sit while making repairs on cars, machines, and other industrial equipment. Also known as maintenance repair stools and tool trolley stools, they have built-in storage for tools. These mobile shop stools have casters that allow them to roll when users need to move the stool. Seats adjust using a pneumatic lever.

ESD Static Control Pneumatic Stools

Electrostatic discharge stools help protect workers from static discharge and environmental pollutants while providing comfortable seating. They are commonly found in labs and work areas with chemicals or sensitive electronic components, such as bioscience, pharmaceutical, and computer applications. These backless stools have pneumatic seats that adjust to an optimal working height. Polyurethane seat with cast aluminum base.

Stackable Stationary Shop Stools

- Square polypropylene seat
- Chrome sled-base legs

These shop stools can be stacked when not in use to save space when storing the stools. Non-swivel stationary stools will not turn or roll during use.
