

Poly Bubble Mailers

■ 3/16" bubble

White mailers resist tearing, cushioning and padding items and protecting them from moisture and water. A self-sealing closure secures the contents for shipment. Commonly used for shipping small parts, sample products, and small gift items that aren't fragile.

Paper Bubble Mailers

■ 3/16" bubble

Mailers cost less than poly bubble mailers and are constructed of a kraft color paper envelope with a bubble liner. The self-sealing closure secures the contents in the envelope for shipment, and the liner provides cushioning to protect the item from damage. Commonly used for shipping small parts, sample products, and small gift items that aren't fragile.

Tear-Resistant Poly Mailers

Tear-resistant poly mailers are flexible envelopes that cannot be easily torn open. They are water-resistant and protect the contents against moisture. These envelopes seal closed. They do not have a padded liner and are ideal for mailing clothing and other items that are not fragile.

Stencil Rollers

These rollers are used to apply roll-on inks to shipping stencils and transfer a message from the stencil to a shipping container or product.

Stencil Rollers—Shipping stencil rollers come with replaceable handle and head.

Stencil Brush—A valve dispenses compatible Rolmark and K-1 ink into

hog hair brush bristles. The protective cover prevents drying when not in use.

Foam Roller with Handle—Economic stenciling system uses Rolmark ink on porous and nonporous surfaces for occasional stenciling.

Replacement Fountain Brush Tip—Replacement tip with hog hair bristles is for stencil fountain brush 5A134.

Stencil Ink

Shipping stencil inks are applied to shipping stencils to transfer the message from the stencil to a shipping container or product.

Spray Cans—Aerosol cans are used to spray ink onto a shipping stencil. This is a faster way to apply ink than rolling it on.

Roller Inks—Water-resistant ink is rolled onto a shipping stencil with a compatible ink roller.

Roller Ink Cartridges—These cartridges screw into express roller 4HY28 sold on this page.

Stencil Cutting Machines and Oil Boards

Stencil Cutting Machines—Punch out letters and numbers on oil boards to create custom stencils for marking shipping containers with messages, warnings, and handling instructions. Compatible with individual shipping stencil oil boards. Not compatible with shipping stencil oil board rolls.

Stencil Oil Boards—Individual rectangular sheets of material are used with cutting machines to create custom stencils. After the machine punches the message into the board, ink is applied to paint the message onto a container or product. Boards are made from materials that resist ink bleedthrough, which helps ensure crisp, readable messages. They can be used on flat or curved surfaces.
