

## Reclosable Poly Bags

- LDPE material, except polypropylene where noted in footnote
- FDA compliant

Reclosable clear poly bags and drawstring bags have a closing mechanism that can be opened and closed multiple times. They eliminate the need for a heat sealer or twist ties, and are commonly used to store mail, food, or small, static-sensitive parts.

**Single Zip Seal**—Bags are reinforced to help prevent splitting when bags are opened or filled. These bags can be opened and closed quickly.

**White Block Write on Surface**—Bags have a section on the middle of the bag for writing a custom message, such as an address, using a marker or pen.

**Double Zip Seal**—Bags provide a secure lock that keeps out moisture and air. The heavy-duty zipper helps prevent leaks and eliminates spills and contamination. These bags have a wide opening for easy sealing and resealing.

**Slide Seal**—Bags have a seal mechanism that glides smoothly across the bag to help eliminate spills or contamination.

**Drawstring Reclosable**—Bags have a drawstring closure to seal the bag securely. The drawstring can be used to hang a sealed bag containing additional parts or instructions where needed.
