uni PAINT

Permanent Paint Markers

Oil-based valve-action pens make glossy, opaque markings on light or dark surfaces. Fast-drying paint formula resists spreading and running when in contact with water or water-based fluids. Create bright, permanent marks with superior adhesion on surfaces including steel and iron, aluminum, pipes and tubes, plastics, glass, rubber, and ceramic.

Marking Tool Color Family	Marking Tool Tip Size Group	Item No.	Pkg. Qty.

Permanent Markers

Felt tips that transfer permanent inks to writing surfaces and building materials. The fast-drying inks are formulated to be waterproof and smear-resistant, making the markers suitable for transferring measurements and cut lines to glass, wood, stone, metal, and some plastics. They can also be used on surfaces that are too moist, oily, or abrasive for pens or pencils.
