

Shredders Cut Style and Security Level Definitions

Strip-Cut—Shreds paper into strands. This style provides the lowest level of security, and is used for nonsensitive information.

Cross-Cut—Shreds paper both lengthwise and widthwise. These shredders create small pieces rather than strips and are used to shred everyday, nonpersonal paperwork.

Micro-Cut—Cuts paper into tiny bits. These shredders are used for sensitive personal information in law firms, medical practices, and accounting firms.

High-Security—Thoroughly destroys confidential documents. These shredders are for any business that needs to securely dispose of highly sensitive documents.

Security Levels—The higher the assigned security level number, the smaller the shredded pieces will be.

Standard Paper Shredders

Intermittent Duty—Require brief rest periods between shredding jobs to keep motors cool and functioning properly.

Continuous Duty—Capable of running continuously, without the need to stop and cool down. These shredders are ideal for high-volume shredding jobs.

Shreds	Max. Shredding Capacity	Cut Style	Security Level	Wastebasket Capacity	Shredding Speed	D	H	W	Throat Width	Mfr. Model	Item No.
