For Cut Style and Security Level Definitions, see page 1376.

High-Security Paper Shredders

These continuous-duty shredders with higher security levels are capable of cutting paper into smaller pieces for additional protection against identify theft and fraud.

Paper Only—Paper-only high-security shredders cross-cut paper into small pieces to prevent exposure of sensitive or confidential data.

Paper and More—These shredders cut paper and other materials into thin, small pieces for protection against identify theft and fraud. They are capable of shredding items such as credit cards, staples, and CDs.

CD and Hard Drive Shredders

These continuous-duty shredders offer secure disposal of data storage media, including hard drives, credit cards, CDs, DVDs, floppy disks, USB sticks, and magnetic tapes. They reduce the digital data carriers into small particles, making data re-creation or recovery virtually impossible, and reducing the possibility of identify theft and fraud.

Cardboard Shredders

Cut and perforate used cardboard to convert it into packing material. The resulting product is a soft, perforated layer of padding that offers an alternative to air bubble packaging. These continuous-duty shredders reduce waste by allowing users to re-use cardboard boxes that would otherwise be discarded.

Shredder Bags and Oils

Shredder Bags—Clear plastic HSM shredder bags fit inside compatible HSM shredders for containing and disposing of shredded particles. They help to keep work areas clean by eliminating messes caused by dumping shredder bins. Recyclable.

Shredder Oil—Petroleum-based circulating mineral oil is designed specifically for use in machines and resists rust, oxidation, and wear. It reduces friction between parts and helps reduce squeaks and other noises.
