## Water-Activated Tape, Tape Machines & Packaging Tables

Scan. Order. Done.  
Details on page A1.

### Water-Activated Kraft Tapes

Water-activated Kraft tape, also known as reinforced tape, is run through a tape machine that applies water, activating the glue on the tape. It is made of reinforced fiberglass strings that are difficult to tear apart. A box cutter or utility knife is required to cut the tape.

Imperial Tape WxL	Metric Tape WxL	Tape Thickness	Tape Tensile Strength	Tape Roll Diameter	Tape Color	Item No.	Pkg. Qty.

### Water-Activated Manual Kraft Tape Machines

Machines automatically apply water to Kraft tape, activating the tape's glue. They include a dial for manual selection of tape length and a lever for dispensing the tape. Commonly used for low-volume Kraft tape applications.

For Maximum Tape Width	For Maximum Tape Roll Diameter	Tape Dispensing Length	Machine LxWxH	Water Bottle Capacity	Color	Material	Includes Heater	Brand	Mfr. Model	Item No.

### Water-Activated Electric Kraft Tape Machines

Machines automatically apply water to Kraft tape, activating the tape's glue. They require the push of a button to select the desired tape length. No dials or levers are necessary. This method requires less strain for the user than a manual Kraft tape machine.

### Packaging Tables

- Min. tabletop height: 30"
- Max. tabletop height: 36"

Packaging tables are used by employees in warehouses as a workspace for wrapping and taping boxes, mailers, and tubes for shipment.

**Laminate-Top**—Tables resist scratches and stains. Laminate is lightweight, nonconductive, and can be cleaned easily in the event of a spill.

**Particle Board-Top**—Used for light- and medium-weight packaging applications. They resist denting and distortion and are easy to clean.

**Solid Maple-Top**—These tops are more durable than particle board tops and are used for high-volume medium- and heavy-weight applications.

**Cardboard Storage Stand**—Optional stand keeps boxes clean and off the floor. Compatible with PRO-LINE benches.
