

For more boxes, see [Grainger.com](http://Grainger.com).

**Insulated Box Liners**

- Min. temp.: -60°F
- Max. temp.: 180°F

Made of flexible air bubble packaging with a layer of shiny, reflective film. They fold into a shape that lines boxes and close at the top and seal the contents. Used for shipping perishable products, and keep excess heat or cold out of the package, preserving the contents and preventing spoilage of food or medication. FDA compliant materials.

**Gaylord Container**

**Bulk Cargo Container**

**Lids for Gaylord & Bulk Cargo Containers**

**Gaylords and Bulk Containers and Lids**

Half Slotted Container (HSC) closure style boxes have bottom flaps that meet at the center of the box; however, there is no cover or flap on top. These boxes are for applications where boxes require frequent loading and unloading. Typically, a lid is required to close the box. Regular Slotted Container (RSC) have top flaps that meet at the center of the box when folded and are usually closed using tape or staples.

**Gaylord Containers**—These large boxes have outside measurements of 48"L x 40"W and varying heights that fit on a pallet. They hold and organize bulk loads and transfer large shipments between locations. They are commonly used to collect recycling, trash, or debris at a facility.

**Bulk Cargo Containers**—Are measured with outside dimensions for matching to pallet sizes. These large boxes consolidate and transfer large shipments that need to stay together from one location to another. They are commonly used for master packing bulk loads of similar products or to collect garbage or recyclable materials in a facility.

**Lids for Gaylord and Bulk Cargo Containers**—Cover and close bulk cargo and gaylord containers while protecting the contents from dirt and dust during transport or storage. They allow bulk cargo and gaylord containers to be stacked within warehouses or storage facilities. They can be reused as covers or flipped upside down and used as a tray to store and organize items in a warehouse or facility.

**Reinforced Literature Mailers**

- White color

Triple-layer sidewalls and double-layer front panels prevent the package from tearing or bursting during transit. They are stronger than standard literature mailers and ideal for shipping fragile items wrapped in protective packaging material.

**Printed Moving Boxes and Kit**

**Printed Moving Boxes**—Large enough to hold household items and small enough to be handled by movers and stacked in a truck or container for transport. They are preprinted with labels that allow movers to write in identifying information.

**Kit**—Includes a combination of products for packing and moving household items. Boxes have labeled areas for writing in contents or other identifying information. Protective packaging material wraps fragile items to protect them from damage during transport such as cracks or chips. Tape seals a packed box, and markers label boxes with contents. Moving kit includes:

- (5) boxes: 16" x 12-1/2" x 12-1/2"; (4) boxes: 18" x 18" x 16"; (2) boxes: 24" x 18" x 18"; (1) tall box: 26" x 6" x 36-1/2"
- (2) rolls of tape: 2" x 55 yds.; (2) rolls of bubble wrap: 16" x 9"; and (1) black marker.

**Corrugated Pads**

**Standard-Duty** pads are sheets of cardboard for layering between items on a pallet. They separate products in a stack, protecting them from damage or slippage and can protect the floor from pallet base damage.

**Heavy-Duty** double-walled cardboard sheets are for layering between heavy products, such as paint cans, bricks, or appliances.
