Paint Can Shipping Kits

- Berlin brand items are UN Rated
- Polar Tech brand items are UN/USA D.O.T. Approved containers

These preassembled boxes are for shipping containers of paint, primers, or floor coatings. They are labeled with codes that identify the contents, and they are printed with arrows that help handlers keep the boxes in an upright position during transit.

Cold Packs

- Reusable

Gel—These packs are flexible when not frozen and contain refrigerant gel that stays colder longer than ice. They help maintain a consistent temperature inside boxes or pallets of perishable products. Moisture safe packs have a nonwoven poly cloth that absorbs moisture.

Freezer—Rigid cold packs resist damage from punctures and can last for years. They contain a nontoxic gel that helps maintain a consistent temperature in coolers and ice chests to prevent perishable products from spoiling.

Cold Packs—These leak-proof packs of refrigerant gel stay colder longer than ice. They help maintain a consistent temperature inside boxes or pallets of perishable products.

Insulated Foam Shipping Container 12F276

Insulated Shipping Kits

Box and Foam Kits—Preassembled kits include a shipping box with a lidded foam insert for packaging and shipping food, beverage, and pharmaceutical products. The foam container holds the product and fits securely into the box. These kits help keep the package temperature constant and prevent damage to the products from excessive heat or cold.

Foam Containers—Lightweight boxes made of expanded polystyrene have a tight-fitting lid that closes the box opening with an insulated seal. These reusable containers resist leaks and keep food and medical supplies cold during transport.

Insulated Plastic Shipping Containers

Reusable boxes or totes secure food products for transport. These hard plastic containers help maintain a constant temperature inside the package and protect the contents against damage from excessive heat or cold. They are more durable and maintain temperature longer than corrugated boxes and foam containers.

Insulated Mailers

■ 3/16" bubble
These envelopes with a self-sealing closure hold small product samples or individual pill containers. They are made of air bubble packaging material with a layer of shiny, reflective film that keeps excess heat and cold out of the package. They maintain a consistent temperature for the contents, preventing spoilage of food products or damage to medications. FDA compliant materials.
