

Oven Ranges

For residential use.

Electric Ranges—Use heated coils to cook food on the stovetop or inside the oven. These ranges offer precise heat settings but take longer to preheat.

Natural Gas—Pre-heat faster than electric ranges and provide evenly-distributed heating while cooking.

Safety Burners—Replace the existing heating coils on electric oven ranges and reduce the likelihood of cooking-related fires. These burners are a universal fit to oven ranges and are suited for assisted living facilities and multi-family homes.

Countertop Convection Ovens

These portable ovens use electrically heated coils and an internal fan to evenly distribute heat to cook food. Higher wattage countertop convection ovens cook food more evenly and faster than lower wattage countertop ovens. Lower wattage countertop convection ovens are more cost-effective. 794HH8 is also an air fryer.

Undercounter Dishwashers

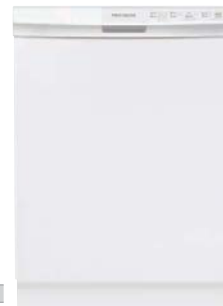

■ ENERGY STAR certified

Ideal for use in small kitchen areas. Feature multiple wash cycles and heated drying systems.

Consumer Dishwashers—Operate quietly for use in small businesses, apartments, and other residential applications.

Commercial Dishwashers—Keep water hot enough to sanitize dishware and personal protective equipment (PPE) such as face shields and goggles.
