Ice Bins

■ Ice makers sold separately

These bins store ice cubes at frigid temperatures and have a door to access the ice. These machines do not produce ice, and bins must be manually filled with ice or paired with an ice maker. Legs included. For compatible ice machines, see grainger.com.

Ice Machine Cleaners & Sanitizers

Ice machine liquid cleaners and disinfectants sanitize ice makers, improving ice taste and machine efficiency. Regularly cleaning an ice machine descales lime, prevents slime build-up, and removes lingering odors. Ice machines should be cleaned two to four times per year.

Ice Maker & Dispenser Accessories

Stands—Sit level on floors to provide a stable base allowing for freestanding use of ice makers and dispensers. Stands also provide extra storage space.

Drain Pumps—Empty excess water from an ice machine to a nearby floor drain or bucket.

Float Valve Reservoir Assemblies—Maintain water pressure in an ice maker or dispenser.
