Machine-Grade Stretch Wrap

This wrap is installed on a stretch wrap machine. It comes on larger, heavier rolls than hand-grade wrap. Stretch wrap machines are used in medium- to high-volume packing and shipping applications.

Cast Stretch Wrap Films—The film protects the contents from tampering and damage, and is quieter to apply and has more cling than blown film. It also provides improved clarity over blown film for viewing bundle labeling and requires less force to stretch the wrap during application, reducing worker fatigue.

Blown Stretch Wrap Films—Blown film is less likely than cast film to change shape or stretch after application, which makes it a good choice for heavy, irregular loads with sharp edges.

Blown Anti-Static Stretch Wrap—Used to protect sensitive electronics from electrical shock or static during storage or transportation.

Extra-Wide Portable Stretch Wrap

Stretch wrap covers more of the pallet than traditional wrap. This reduces the number of times a worker must walk around the pallet to cover it completely, minimizing fatigue and conserving wrap for cost efficiency. Wrap is applied using a rolling dispenser and can easily be wheeled around a facility.

Gauge	Overall Width	Overall Length	Item No.
80 ga	40"	5,000 ft	56HG15
80 ga	50"	5,000 ft	56HG16
80 ga	60"	5,000 ft	56HG17

Pre-Stretched Wrap

Stretch wrap has been mechanically stretched close to the breaking point, then wound onto rolls, requiring less energy to hand wrap around a pallet. Offers consistent wrapping tension, good load stability, and light weight. It can be applied using a walk-forward technique.

Gauge	Overall Width	Overall Length	Cling Type	Rolls per Case	Item No.
25 ga	17"	1,476 ft	2-Side	4 Rolls	56HG13
30 ga	15½"	2,000 ft	1-Side	1 Roll	11Y824
35 ga	15"	1,476 ft	1-Side	1 Roll	11Y823
39 ga	15"	1,476 ft	2-Side	4 Rolls	56HG14

Top Sheeting Replacement Roll

Top sheeting is used to cover the top of a pallet before wrapping the sides. Replacement rolls are composed of perforated sheets. They have handles with brake and are smaller than top sheeting rolls, making them ideal for low-volume and hand-wrapping applications.

Sheet Length	Sheet Width	Mil Thickness	Core Size	Color	Sheets per Roll	Rolls per Case	Item No.
60"	60"	1.25 mil	1 in dia	Clear	Continuous Roll	1 Roll	15C010

Product-Concealing Stretch Wrap

Opaque cast wrap provides added security by hiding product labels when shipping sensitive or valuable items. It is a continuous length of plastic that is wrapped around the sides of a pallet or bundle to protect the package from dust and moisture, prevent and indicate tampering, and keep items together.

Handle Opaque Stretch Wrap Films—Wrap has an integrated handle that protects hands from the sharp edges of the core, reduces cuts and abrasions, and eliminates the need to purchase a handle separately.

Hand Opaque Stretch Wrap Films—Wrap is manually wrapped and can be applied with or without a handheld dispenser. These rolls are smaller than machine-grade wrap rolls, making them easier to transport around a facility. Hand-grade wrap is used in low- to moderate-volume wrapping applications and can be used to wrap boxes and irregular loads or bundles, such as lumber.

Machine Opaque Stretch Wrap Films

This wrap comes on a larger roll than hand-grade wrap and is installed on a stretch wrap machine. It is used in medium- to high volume packing and shipping applications to conceal bundle contents.

High-Performance Stretch Wrap

This wrap provides the same strength and puncture resistance at a thinner gauge than standard stretch wrap. It is a continuous length of plastic that is wrapped around the sides of a pallet or bundle to protect the package from dust and moisture, prevent and indicate tampering, and keep items together.

Hand-Grade—Used in low- to moderate volume wrapping applications or to wrap boxes and irregular loads or bundles, such as lumber.

Machine-Grade—Larger and heavier than hand-grade stretch wrap.

Pallet Covers

These covers fit over loaded pallets to protect the contents from dust, dirt, and debris during transport or storage in a warehouse or loading dock.
