## Heat-Activated Shrink Wrap Films

Wrap tightly around items to keep them contained during transport or protected against weather. Film shrinks when exposed to heat. Use to protect small packages, loaded pallets, and dry docked boats. For use with heat guns or shrink tunnels, sold separately.

**Industrial, Single-Wound Polyethylene Shrink Films**—Waterproof, durable, and high puncture and tear resistant. Provides UV protection for up to 9 months. Shrink with propane heat gun, sold separately.

**Centerfold Polyolefin Shrink Films**—Polyolefin wrap is approved for direct food contact. It forms a skintight protective wrap over packages.

**Centerfold PVC Shrink Films**—Clear PVC has maximum shrink of 40%. This shrink film is economical for manual applications. It forms a skintight protective wrap over packages.
